PROJECT

LITIGATION INFORMATION GATEWAY
Front End : Python
Back End : MySql Server

Abstract:

- Design and develop a court case management software with features for recording case information, adding and selecting lawyers from an existing list, and managing invoices for hearings and lawyer charges.
- The system should provide comprehensive management of court cases from the client's perspective and be user-friendly.
- Additionally, create a website where customers can register, search for lawyers by category, view lawyer profiles, and schedule meetings.
